PERSONAL PROJECTS

Sophisticated Real-Time Chat Application —

Engineered an advanced chat platform with the MERN stack, prioritizing secure, real-time communication. Implemented JWT for robust authentication, integrated cutting-edge state management, and designed a responsive, visually refined interface.

AetherAI: Modern Frontend Showcase —

Developed a visually striking website to demonstrate frontend skills. Utilized contemporary design principles, dynamic animations, and parallax effects to create a sleek, engaging user experience.

EXPERIENCE

Business analysis intern at Cognify Technologies — (June 2024-July 2024)

Conducted data analysis and provided insights to drive business strategies. Collaborated remotely to ensure accuracy and effectively communicated findings to stakeholders.

Full Stack Developer at Tia — (July 2024)

Contributed to constructing Tia's official website utilizing the MERN stack, with a concentration on front-end programming. Improved user experience by using responsive design and interactive elements, resulting in a seamless and engaging interface.
