

CASE STUDY 02

Turning Campus Culture into Digital Momentum

Institution: KIT - KALAIKARNKARUNANIDHI INSTITUTE OF TECHNOLOGY

Platform: @thecampustories.ig

Role: Social Media Team – Content & Strategy

While studying at KIT, I worked with the social media team to transform our college's digital presence. My focus was crafting content that turned everyday campus moments into engaging stories. Through strategic planning and creative execution, we reshaped @thecampustories.ig into a vibrant showcase of student life, innovation, and achievement that resonated with our Gen Z audience.

Content Strategy & Creative Execution

We blended campus storytelling with trending social media formats to create content that felt both authentic and entertaining. My role involved scripting, ideating, and shaping narratives that matched how students actually consume content.

"Bits of KIT" Series

30–60 second videos showcasing labs and facilities in dynamic formats. From the Cadence Lab's advanced EDA tools to student innovation spaces, we made tech exciting.

Trend-Based Content

Student victories, campus reels, relatable memes, and infrastructure highlights. We turned every aspect of college life into shareable moments.

Strategic Storytelling

Combined entertainment with information. Each post balanced relatability with aspiration, creating content students wanted to share with friends.

Impact, Learnings & Digital Growth

The content transformation delivered measurable results during active campaign cycles. More importantly, we created a digital community where students actively engaged, tagged friends, and amplified our content organically.

Key Learnings:

- Consumer behavior patterns and social media psychology
- Trend adaptation strategies that maintain brand authenticity
- Audience retention mechanics and engagement triggers
- Team coordination for consistent creative output

This experience taught me how digital storytelling, emotional hooks, and strategic timing drive real engagement performance.
